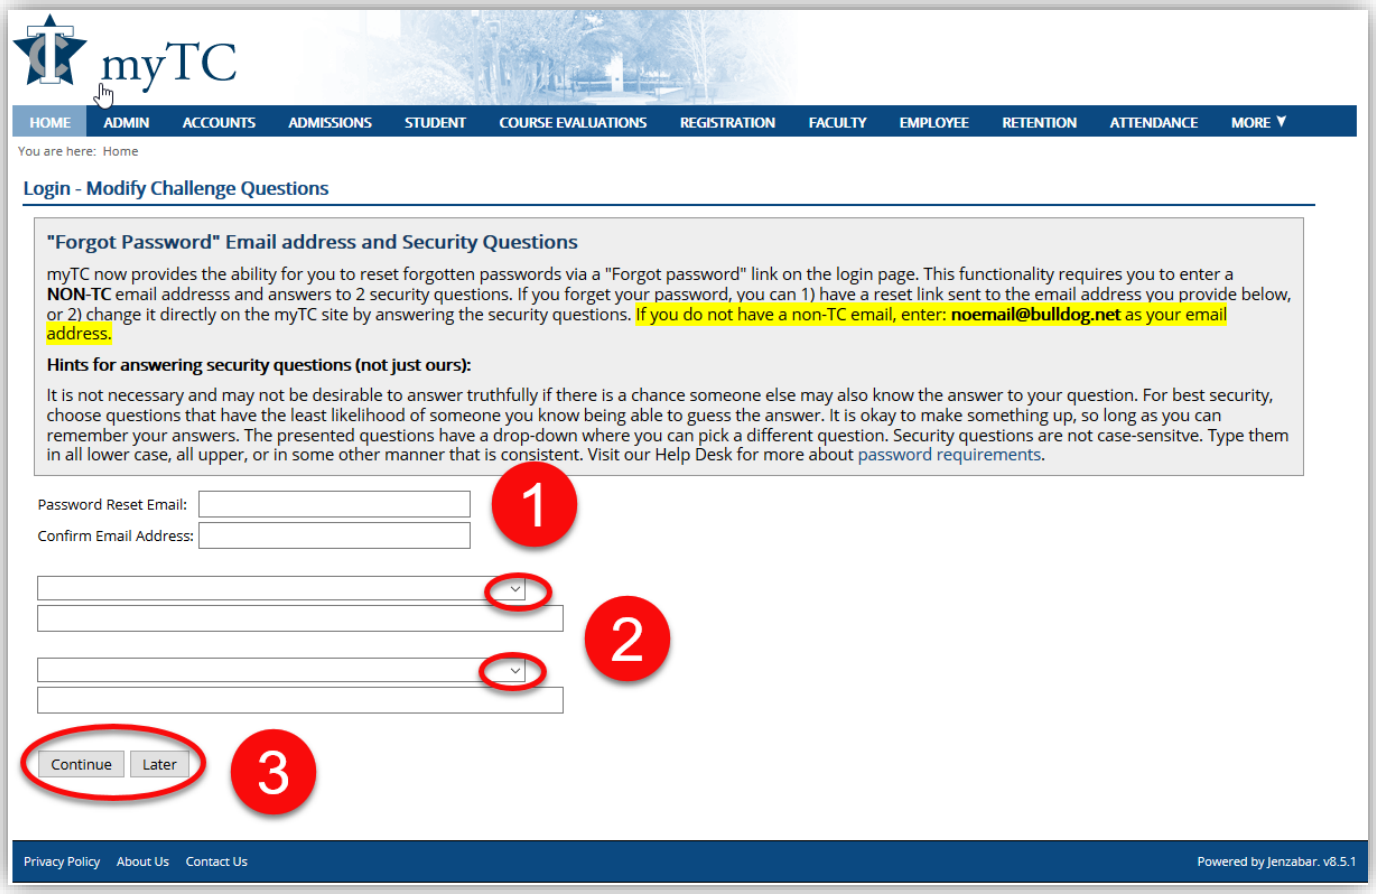
Password Challenge Questions Setup

After logging into ***myTC***, you will be asked to setup two challenge questions so that if you forget your password, you can still login into ***myTC***. This will save you time and allow you to change your password once you answer your challenge questions.


1. If you have a non-TC email, then type it here to enable a reset link to be sent to that email address. An email address is required to continue. If you don't have a non-TC email, type the suggested phony one, which will not generate a password reset link. **Whatever email is entered will need to be remembered**, because that email address is required to be entered to use the security questions feature to reset your password.
2. Please select a question that you know the answer to and others will not. Type in the answer below that question. Please select a second question in the next drop down. Type in the answer below that question.
3. Then click ***Continue*** to complete the setup.
